DETAILED ACTION

Allowable Subject Matter

1. Claims 1-36 are allowed.

The following is an examiner's statement of reasons for allowance: Guheen et al. teach a system for establishing plan to test components of web based framework by displaying pictorial representation and conveying indicia coded components of existing network framework by displaying pictorial representation and conveying indicia coded components of existing network framework. The prior art of record does not teach a method for injecting virtual flaw signals into a nondestructive test system, comprising the steps; providing an excitation signal from the nondestructive test system to the test probe and a virtual flaw injection circuit; determining virtual flaw parameter signals from the test probe position signals and a stored virtual flaw map for the test piece; sending the virtual flaw parameter and an output signal from the test probe to the virtual flaw injection circuit; and transmitting the virtual flaw response signal to a test probe input of the nondestructive test system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Guheen et al. teach a system for establishing plan to test

components of web based framework by displaying pictorial representation and conveying indicia coded components of existing network framework by displaying pictorial representation and conveying indicia coded components of existing network framework. Light et al. teaches a method for obtaining optimized computed tomography images from a body of high length-to-width ratio using computer aided design information for the body. Pike et al. teaches apparatus and method for viewing and inspecting a circumferential surface area of a test object. Halsey teaches nondestructive testing procedures.

Contact Information

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Raymond whose telephone number is 703-308-6235 until January 26, 2004 and 571-272-2221 thereafter. The examiner can normally be reached on Monday through alternating Friday between 8:00 AM and 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc Hoff can be reached on 703-308-1677. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-4447 for regular communications and 703-308-0956 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1782.
